PROFILE

Recent Games Programming graduate with hands-on experience with C/C#/C++ in both engine-level and gameplay systems development in Unreal and Unity. My background includes founding a programming society and spending a year mentoring peers in programming as a teaching assistant. I'm now looking for an internship or junior role where I can bring my skills, curiosity, and technical foundation contribute to a real production pipeline.

EMPLOYMENT

Programming Teacher Assistant

Helping college students develop games and understanding programming principles.

09/2022 – 06/2023 South Tyneside College

- Taught programming fundamentals and principles via game development with Game Maker Studio2
- Developed education prototypes and showcase pieces to effectively communicate programming ideas with lecturers and students.
- Maintained in-depth knowledge of relevant fields related to taught engine and language

GAME JAMS

C.A.PJam

22/11/24 – 24/11/24 & 28/11/25 – 30/11/25

[C.A.P Jam - itch.io](#) 2024

[C.A.P Jam - itch.io](#) 2025

- Worked collaboratively with creation and art societies to host, organize, and run the C.A.P game jam two years in a row.
- Created the website and advertising material as part of production and publication.

EDUCATION

BSc(Hons)GamesProgramming (1:1)

09/2020 – 07/2023 Teesside University

First Degree 85% Average (A*)

• Dissertation	93%
• AI for Games	81%
• 3D Graphics	73%
• Journeyman	90%
• Mobile and Multiplayer	76%
• Games Engine Construction	91%
• Programming for Game Engines	82%
• Game Software Engineering	87%
• Algorithmic Problem Solving	86%
• Game Creation	89%
• Game Programming Fundamentals	81%

Thank You for Reading

SKILLS

Unity, Unreal Engine, Visual Studio, Rider, GitHub / Git, C++, C#, JavaScript, OpenGL

KEY PROJECTS

[Pathfinding](#) (Team of 3) | 81%

[Resource-Manager Survival](#) | Unity / C# / Package

Worked in a team of three programmers to build a vertical slice demo combining our own AI algorithms. I developed a reusable Unity package implementing basic grid-based pathfinding for units in a scene.

[Journeyman](#) (CrossDiscipline) | 90%

[Co-Op Platformer](#) | Unreal Engine 5 / Blueprints

Led the technical development of my Astrobot themed Journeyman project, collaborating closely with designers and artists. I implemented the core character ability mechanics and co-op functionality.

EXTRA- CURRICULAR

- Founder / Chair of Games Programming Society
2023 – 2026 Teesside University
- 3 Year Member of Games Creation Society
2023 – 2026 Teesside University
- Games Programming Course Representative
2023 - Teesside University
- Programming Representative Speaker
2024 - British Computing Society

AWARDS

- Winner of Cost-of-Living Challenge
2022 – Sunderland Software City
- Charity Voluntary Web Development
2023 – Caring Personal Assistants Ltd.

INTERESTS

- Hosting game jams and making small scale projects to help learn / teach different programming concepts.
- Rom hacking old games to learn how older / lower-level architecture works and how code was developed under bigger restrictions.
